

Dropout Detective™ - Identify, Prioritize & Support Your At-Risk Students

Analyze Students' Behavior

How do you manage your student retention? Today, many schools are managing retention by *reacting* to the students' behavior. And by the time you identify a serious problem, it can be too late to keep that student in class. You are working by looking in the rear view mirror because you can only see what has already happened. **AspirEDU's Dropout Detective™ replaces that rear view mirror with a crystal ball.** We analyze the information that you already have and use our proprietary technology to identify your students that are at most risk. Dropout Detective allows you to *pro-actively* manage retention by alerting you to behaviors and patterns that lead to high student attrition. With Dropout Detective, your team can spend its time contacting students instead of trying to identify the ones that need support.

Student	Risk Index	Trend	Last Contact
Emily Samsuels	83	↓ -17	2 hours ago
▲ Harper Nevin	78	↑ +25	a few seconds ago
▲ Michael Bynes	66	↓ -34	an hour ago
Hannah Richardson	64	↓ -12	5 days ago
Jacob Evans	50	↓ -50	
Lucas Peterson	46	→ +0	4 days ago
Emily Wood	36	↑ +8	
▲ Ethan Coleman	29	↑ +3	2 hours ago
Sofia Wood	29	↑ +15	2 hours ago
Abigail Cooper	26	↓ -6	
Harper Jackson	22	↑ +6	21 days ago
Emily Richardson	20	↓ -72	
Lucas Ramirez	20	↑ +2	
Michael Adams	18	↓ -4	7 days ago
Sophia Ostrander	16	↓ -63	
▲ Aiden Tishman	15	↓ -65	8 days ago

Views for Administrators, Advisors and Instructors

Whether your school manages student retention centrally or allows instructors to manage it, Dropout Detective provides you with the right tools. Our Administrator View provides you with a unique advantage – identifying at-risk students by analyzing their performance across ALL courses in which they are enrolled. Advisors – and others, like sports coaches – see only the students assigned to them. Instructors receive a single-course version of our dashboard. All views give school personnel the ability to document your student conversations using our Notes tab. If the students have provided contact information, you will have their phone, email, Facebook and Twitter addresses at your immediate disposal.

One of our clients – a university in Jackson, MS – raised its student retention rate by 10.6% in its *first term* using AspirEDU's analytics solutions. See the school's presentation – in their own words – at aspiredu.com/video-library.

How It Works

The current behavior of a student can tell you whether they are going to succeed. Dropout Detective integrates with your existing learning management system (LMS) and reviews grades, missing assignments, last date of attendance and many other factors. Our solution retrieves the necessary data **every night**, applies the algorithm, and presents an easy-to-use dashboard that is updated **daily**. Students are given a Risk Index and are displayed in a red-yellow-green “stop light” format to draw attention to the most at-risk members of the student body. Administrators, advisors and instructors can then drill into the individual student’s profile to determine the risk reasons and to develop a pro-active plan of action. Through search capabilities and filters, schools can target their efforts by assigning the right staff to the right students.

Course	Grade	Missing Assignments	Last Access	Latest Submission	Latest Attendance
GEN104 Introduction to Sociology	14.6	2	12/24/2016	12/23/2016	
MA201 Applied Statistics	73.2	3	12/26/2016	12/24/2016	

Why It Is Important

Students that fail or drop out have a broadly negative impact on schools. Tuition dollars are lost, costs are incurred and a school’s accreditation can be put in jeopardy. And overall graduation rates are harmed. Dropout Detective helps schools to address and improve upon all of these challenges.

Manually Flag Students

Using data is great! But sometimes, school personnel know things about a student that can indicate risk. Dropout Detective allows instructors and others to “Activate Advisor Alerts.” These alerts will trigger emails to advisor and place an easy-to-see flag on the student’s record.

Learn More about Dropout Detective

Contact us today to learn more about Dropout Detective™ and to schedule a web-based demonstration of our capabilities. The system is hosted by AspireEDU and can be deployed quickly and at a reasonable cost. Please write to us at info@aspireEDU.com or visit our web site at www.aspireEDU.com.

FEATURES

- Administrators – View your entire student population in a single dashboard.
- Advisors – View the students assigned to you.
- Instructors – View your students by class, with last access date/time stamp.
- Instantly identify which students are at immediate risk for attrition.
- One-click access to a holistic student profile that reflects participation in all enrolled courses.
- Rolling 30-day & 30-week history of each student's risk profile.
- Predictive analytics based on facts & evidence – not anecdotal, manually entered data.
- Document student interaction with Notes.
- Send automated text and email messages based on students' performance.
