

PROGRESS REPORTS

AspirEDU is excited to announce a new optional feature that is certain to deliver great value to HigherED and K12 schools everywhere.

For many years, Dropout Detective and Grade Guardian clients have been able to generate ad hoc progress reports for individual students manually. This report displays a student's current courses and grades in a single PDF, which can then be emailed to the student. We've provided this service at no extra cost and will maintain this practice.

We are excited to announce an enhanced new feature that allows school users to create progress reports for large groups of students and automatically send them to them.

Users with admin-level access will have the capability to generate progress reports in bulk:

- For the entire school
- For specific Canvas sub-accounts
- For a designated group of students

Schools can choose a date for the email delivery, set an "as of" date for the report data, and even personalize the email template sent to students (and observers for K12 clients).

Instructors can effortlessly create progress reports for all students in a course with just one click—perfect for periodic check-ins with students or parent-teacher conferences!

Please note that the group creation of progress reports and their automated emailing incur a separate fee. However, AspirEDU has structured its pricing to make this feature affordable and significantly more manageable than relying on a print shop or utilizing the school's resources for printing these reports. For more information about Dropout Detective and Grade Guardian's latest and most exciting feature, please get in touch with us at info@aspiredu.com.
